Dear friends,

We are delighted to invite you to the 2nd Ege University Hereditary Angioedema (EGEHERO) Symposium, to be held on **May 11-13, 2023, in Izmir, Turkey.**

Following up on the high efficiency and successful first national symposium held in Izmir last year, we look forward to meeting you with the National Rare Disease Association and the National Hereditary Angioedema Patient Association.

It will be a great honor for us to listen the HAE from you who are experts on the pathogenesis, genetics, clinic and treatment strategies of Hereditary Angioedema. Also we aim to share our scientific experiences and catch the current developments.

On the other hand, for the first time, we will share the results of Turkey's national "Hereditary Angioedema Database" and "Hereditary Angioedema Attack Application".

It will be a pleasure for us to introduce you to the natural beauties, local flavors and traditional culture of Izmir, the 'Pearl of the Aegean', on the occasion of this congress.

Izmir, historically Smyrna, is one of Turkey's largest ports and its third famous city on the Aegean seacoast. With its 8500 years history virtually, this fascinating city offers every shades of blue and green, is ready to be discovered. Do not forget to bring your swimsuits !

This meeting offers a great opportunity to see the ancient city of Ephesus, Şirince village and the Church of the Virgin Mary also.

We will be very honored and happy to see you among us in our inspiring symposium.

Take your place in this not only satisfying scientific programme but also social aspects in this meeting!

With our very best wishes,

Nihal Mete Gokmen, MD.
Aytul Zerrin Sin, MD.
